

Iron Trellis

Installation Instructions

Three Trellis Panels make a complete Trellis measuring 3 feet wide by 8½ feet high. All three panels can be installed at once or you can install one panel at a time, gradually extending the support as plants climb throughout the season. Connect the Panels together using the bolts and nuts provided.

Brackets with keyhole hangers are included for securing the Trellis to a wall. You will need to provide the screws appropriate for your wall material (i.e.; wood, plaster, brick or cement).
