

Doves on the Wing

A flock of silvery steel doves will bring a beautiful and hopeful message to your garden. Position them as a group or place each one separately.

Assembly: Connect a 3-part stake to each dove, then push the stakes into the ground. If grouping them, we suggest pushing the stakes into the ground at different depths to vary the height of the doves.

Care information: The steel will take on a rusty patina over time. To help preserve the original appearance, you may apply a clear lacquer and re-apply annually or as needed.
