

Trellis Installation Instructions

This Trellis was designed specifically for our popular Terrazza Planter. We recommend using a rubber mallet for assembly.

Assembly Instructions

Parts Included:

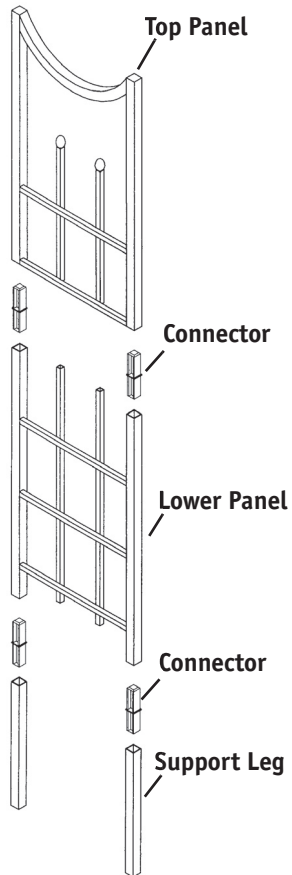

- Top Panel (1)
- Lower Panel (1)
- Support Legs (2)
- Panel Connectors (4 strapped to Trellis)
- Corner Adapters (6 provided, only 2 needed; not shown)

NOTE: Use the 4 Panel Connectors that arrive strapped to the Panels. Do not use the Connectors (Part #25) that are included in the hardware pack. The Connectors in pack do not fit and are not used in any part of the assembly.

Step 1. Remove 2 Finial Caps from the Terrazza Planter and replace them with two Corner Adapters from the hardware pack.

Step 2. Use a rubber mallet to tap a Connector into each Support Leg, then slide the Lower Panel onto the Connectors. Use two more Connectors to connect the Top and Lower Panels. (Follow the diagram at right.)

Step 3. Finally, slide the Legs of the Trellis into the Planter corners.

Trellis shown here is for the Terrazza Square Planter. The Trough Trellis is twice as wide, but assembly is the same.
