

Mitten Tree

Hands and feet stay warmer when socks and gloves are dry. Our powder-coated steel Mitten Tree is an energy-free way to dry wet outerwear, especially woollens that can't be put in a clothes dryer.

Assembly

1. Screw the Bottom Stand (A) onto the Threaded Pipe (B).
2. Slide the Long Hollow Pipe (C) over the Threaded Pipe (B).
3. Slide on a set of Mitten Arms (D), follow with another Hollow Pipe (short).
4. Slide on the next set of Mitten Arms and follow with a Hollow Pipe. Continue adding the parts as shown, being sure to alternate the direction of the Arms up the length of the Tree.
5. Screw the Finial onto the top of the Tree and fully tighten.
6. When you are ready to use the Mitten Tree, place it near the hearth or woodstove, or near a furnace register.
