

Pond Float

This decorative glass float holds a Citronella Tea Light in the top to repel adult mosquitoes. A mosquito dunk fits underneath and slowly dispenses an organic insecticide to control mosquito larvae in the water. The glass float can be placed in a small pond, fountain, or other water feature. ***Tea Lights and Mosquito Dunks are sold separately. Please see Ordering Information below.***

To Use: Place the Mosquito Dunk in the impression underneath the Pond Float, then place the Float on the water. Place a Tea Light Candle in the top impression. Light the candle.

Caution: Be careful if using the glass Float in a fountain basin or other water container made of stone or concrete. For best results, use the float in still water to help prevent impacts and possible breakage.

Never leave a burning candle unattended!
