

Ravello Planter 23"

The Adjustable Water Reservoir converts the Ravello Planter into self-watering planter, keeping your plants from drying out and reducing the time you spend watering.

In addition to the Adjustable Reservoir, we've included a Reservoir Base as a prop to place, upside down, under the Adjustable Reservoir. Because the 23-inch planter is deep, a prop is needed to raise the Adjustable Reservoir high enough to ensure the water fill tube reaches above the soil line when the planter is full.

In addition to placing both Reservoirs in the planter, be sure to follow the instructions included with the Adjustable Reservoir for planting information and tips on maintaining your self-watering planter.
