

Rustic Clay Birdhouse

This little bird hut is made of hand thrown clay and has an opening sized for smaller birds like wrens, chickadees, titmice and nuthatches. Hang the birdhouse from a tree, under an eave of a house or other outbuilding. A drainage hole keeps the inside dry.

Cleaning: To dislodge an old nest, first break up the nest with a sharp instrument, then hose out the materials. **Bring the birdhouse indoors during freezing temperatures.**
