

This compost-based organic mix has been specially formulated to provide a light, well-aerated growing medium that will promote germination and excellent root development of vegetables, flowers and houseplants.

Gardener's Best®
Organic Seedstarting Mix

compost-based seedstarting mix

DIRECTIONS FOR USE:

Moisten the mix thoroughly before filling containers. For best results, use lukewarm water. No need to fertilize until transplanting time. All ingredients are acceptable for use in certified organic production.

INGREDIENTS: Mature compost, high quality sphagnum peat, rock phosphate, gypsum, protein meal and perlite.

SIZE: 6 QUARTS
