

Forever Raised Bed

Raised garden beds are the easiest way to grow your own fresh vegetables. The Forever Raised Bed sets up in minutes and lasts for decades. Made from a composite of recycled wood and plastic, the Raised Bed is attractive and has the look and feel of silvery aged cedar, but will not splinter or rot.

These assembly instructions are for the 3' x 3' and 3' x 6' Forever Raised Beds.

Assembly Instructions

Tools needed: drill and level

The 3' x 3' Raised Bed includes the following parts:

- (4) 3' Sides
- (4) Aluminum Corners
- (4) Corner Caps
- (32) 3/4" Phillips screws

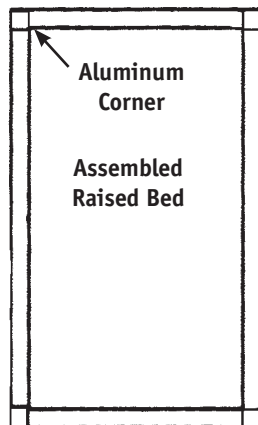

The 3' x 6' Raised Bed includes the following parts:

- (2) 3' Sides
- (2) 6' Sides
- (4) Aluminum Corners
- (4) Corner Caps
- (32) 3/4" Phillips screws

Step 1. Choose a location in your yard or garden that is appropriate for the type of plants you will be growing in your raised bed. Clear the site of sod and weeds and make it as level as possible.

Step 2. Place the assembled boards on their sides to form a 3' x 3' square bed or 3' x 6' rectangular bed and seat the ends into the four Aluminum Corners. Make sure the boards are fully seated and level with the bottom of all four Aluminum Corners.

Step 3. Use the screws provided to connect the boards to the Corners from inside the bed. Be sure the screws enter straight and not at an angle.

Step 4. Insert the black plastic Corner Caps into the top of each Aluminum Corner.

Step 5. Place the assembled bed in the site you have cleared and fill it with soil. We recommend mixing in plenty of organic matter such as aged manure or compost. You are now ready to begin planting!
