**Uses Most**

**Energy**

**1298**

KWh/year (kilowatt hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only standard size front loading clothes washers are used in this scale.

**Clothes washers using more energy cost more to operate.  
This model's estimated yearly operating cost is:**

**\$ 11.31**

**\$ 3.30**

When used with an electric water heater      When used with a natural gas water heater

Based on eight loads of clothes a week and a 2000 U.S. Government national average cost of 8.03¢ per kWh for electricity and 68.6¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and the use of the product.
