

INTEMPO DIGITAL FIRST TO MARKET WITH IPOD SPEAKER SYSTEM & DOCKING STATION IN BLACK

The compact iDS-01 iPod speaker system and docking station from Intempo Digital just got better. It fuses style with cutting edge technology making it the ultimate iPod accessory...and now it comes in black, a perfect complement if you can get your hands on the black iPod Nano, which is currently flying off the shelves.

Lightweight and portable, the iDS-01B is a powerful speaker system which also allows you to charge your iPod, iPod mini, iPod Nano and iPod photo through the built-in dock, while downloading new tracks or listening to hi-fi quality sounds at home, work or at play.

Simply sitting in the docking station allows the iPod to be simultaneously charged while listening or viewing favourites. Its ease of use is unbeatable with simple controls and easy installation. The USB connector allows downloading from a PC/Mac so your music library can be regularly updated.

The iDS-01B is also compatible with many other audio devices such as Walkman, MP3, iPod Shuffle and MiniDisc played through the speaker system.

The iDS-0B is just 23 cm long x 12 cm high x 9 cm deep and includes powerful 2 x 6 watt RMS with neodymium speakers and 3D Super Bass Design. It is mains operated and comes with external AC adaptor and 3.5mm stereo line in jack with stereo cable for connecting other audio devices.

The Intempo Digital iDS-01B is available now at around £29.99 from Comet, Carphone Warehouse, Amazon.co.uk, dabs.com, misco.co.uk, and empire direct.

**The iDS-01B does not charge iPod Shuffle*

Notes to editors

About Intempo Digital

Intempo Digital was set up to develop and market a range of affordable, cutting-edge technologies that enhance your lifestyle and complement your living and working spaces. The company has strived to make DAB digital products easy-to-use and intuitive, whilst injecting fun and freshness into the radio manufacturing market.

The KTM-02 is the latest model in the award winning KT range. These retro styled radios come in an array of colours including baby pink, double cream, latte, baby blue and slate grey. The PG range was the first to market and has a more traditional look available in beech and walnut wood effect finishes. The BB-01 boombox and the RS-01 CD/radio alarm clock are new and stylish additions to the range of DAB products this autumn. Intempo Digital has also added an iPod speaker system and docking station to its range, which is available in black and white.
