CUSTOM COMPONENT OPTIONS

FEATURED CUSTOM SHAFT & GRIP OPTIONS

TaylorMade's industry-leading custom component program allows golfers to select from a plethora of both shaft and grip combinations from many of the industry's leaders in innovation and technology for a fully personalized experience. The featured components below are rising in popularity both on professional tours around the world as well as with consumers. We highly recommend you start your path to complete customization by referring to the Custom Shaft and Grip Options booklet for an in-depth look at all of our customization options.

METALWOOD SHAFTS

ALDILA ROGUE MAX

"Rogue MAX offers unmatched performance and consistency through the use of advanced aerospace materials and an innovative design," said John Oldenburg, Aldila's Vice President of Engineering and Product Development. "The Rogue MAX incorporates advanced materials and a unique 0/90 carbon fiber multi-axial weave that provides consistency and stability characteristics never before available in a golf shaft."

MITSUBISHI RAYON TENSEI™ CK PRO WHITE

TENSEI™ CK Pro White expands the TENSEI™ CK Series – which features a multi-material design that incorporates more performance-oriented materials than we've ever used in a shaft. Building off of the classic tip-stiff, low-launch bend profile preferred by stronger players the TENSEI™ CK Pro White incorporates the same Carbon Fiber/DuPont™ Kevlar® (CK) weave in the butt-section as the Pro Blue – providing enhanced stability and maximum feel. This series also incorporates High Modulus, premium 40 Ton prepreg throughout the shaft. A Boron-reinforced tip-section delivers lower torque, and promotes your preferred control and stability.

GRAPHITE DESIGN TOUR AD TP

The new Tour AD TP shaft has a medium stiffness starting at the handle thru the mid-section of the shaft and a stiff tip profile to promote a mid/high launch condition and low spin. The new Tour AD TP also utilizes the latest in graphite material from Toray Industries, Inc., TORAYCA® T1100G carbon-fiber pre-preg with NANOALLOY® technology in the tip section of the shaft for additional shaft stability, exceptional feel and precise ball control.

PROJECT X HZRDS YELLOW

The new HZRDUS Yellow is a backweighted low spinning shaft featuring a straight tapered midsection. This profile is perfect for players with a smooth tempo who want to reduce launch and spin rates. The backweighting allows for additional mass to be added to the head for increased ball speed.

IRON / WEDGES SHAFTS

TRUE TEMPER DYNAMIC GOLD AMT

Dynamic Gold AMT shafts have the same performance DNA as Dynamic Gold and are designed to get progressively heavier as golfers move from their long iron to short iron. Lighter long irons produce increased speed and higher initial launch, which makes them easier to swing and deliver a softer landing. The Tour-weighted short irons produce traditional Dynamic Gold accuracy, consistency and trajectory. AMT stands for Ascending Mass Technology, which means the steel shaft's weight increases in 3 gram increments from the 3-iron to PW, while the balance point is adjusted so that the swing weight is consistent to standard Dynamic Gold throughout the set.

KBS TOUR FLT

KBS is proud to introduce the newest member of the KBS Golf Shaft Family; the KBS TOUR FLT. The KBS TOUR FLT is a Tour influenced shaft to fit the broadest range of players, from the Amateur Golfer, to a Tour Professional.

Offering a lower ball flight for the 8 Iron and down clubs, and a higher ball flight for the 6 Iron and up, it accomplishes this while being longer and providing more spin, with the consistency and efficiency of more control.

NIPPON N.S. PRO MODUS3 TOUR 105

The all new N.S. PRO MODUS³ Tour 105 - lighter weight to increase club head speed for longer distances, straighter shots, stronger trajectory, and more consistent performance! The N.S. PRO MODUS³ Tour 105 was first brought out on tour as the N.S. PRO MODUS³ PROTO ST in 2010 and was immediately put in play. The PROTO ST was in the winning bags of eight professionals upon its launch and has become the second most popular MODUS³ iron shafts on tour, just behind the N.S. PRO MODUS³ Tour 120.

- Traditional, smooth bend profile.
- Mid-spin, mid-flight.

UST RECOIL™ 760/780 ES

The new Recoil 760 and 780 shafts are an evolution of the Recoil 660/680 models. Recoil 760/780 shafts are designed to provide maximum control and distance for all golfers through the latest in design and materials.

Recoil Technology provides greater consistency, distance and trajectory control

Recoil Technology provides optimal spring effect in the walls of the shaft and more efficient energy transfer to the ball for increased velocity and greater distance.

ES = Enhanced Stability for more control and feel
Stiffer mid and butt produces better shot control
Softer tip improves feel and trajectory
Lower torque for improved shot dispersion

GRIPS

GOLF PRIDE - MCC +4

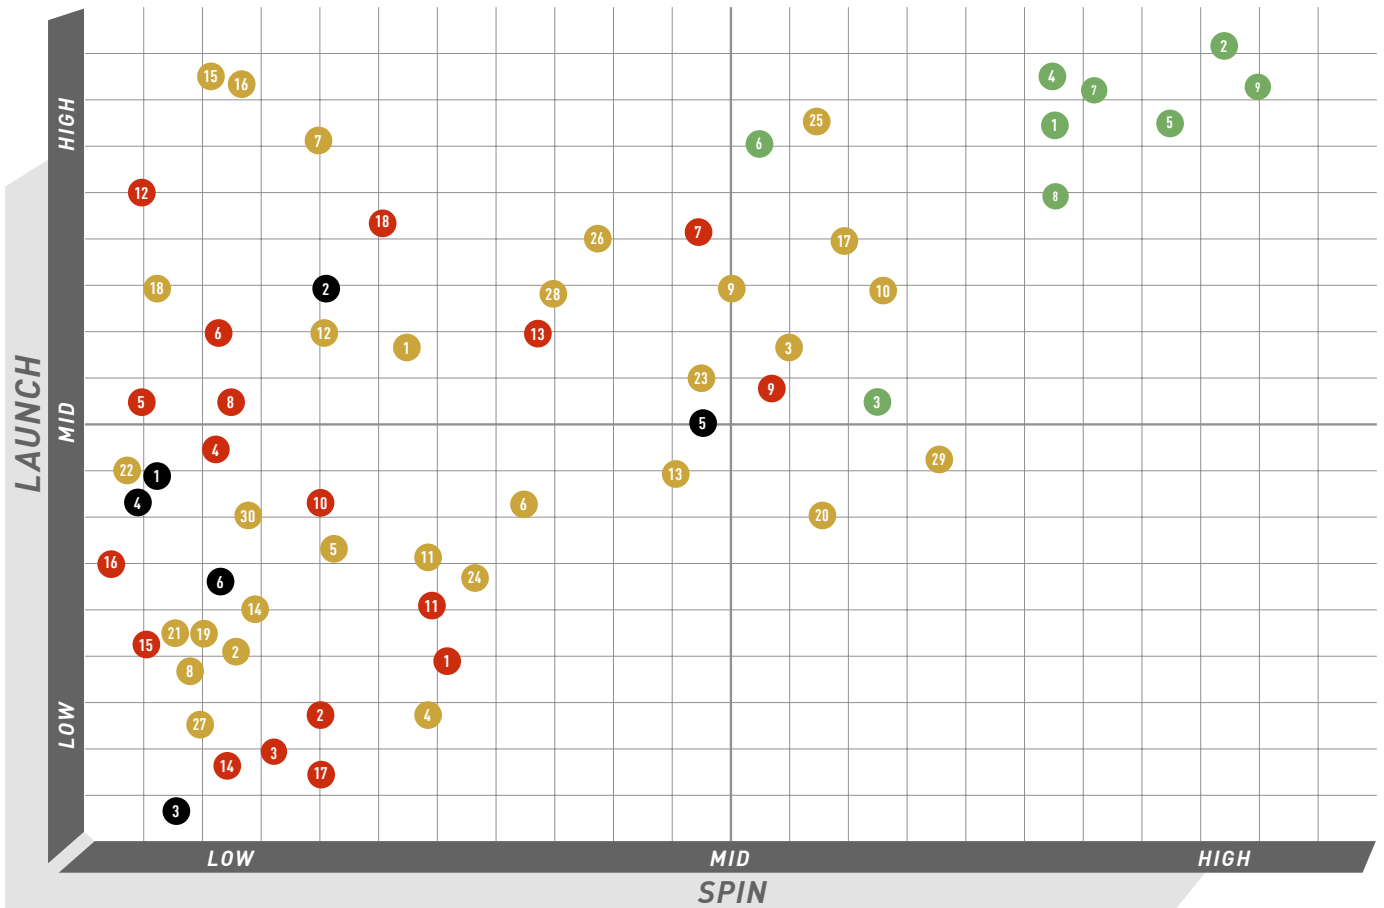

The New Decade® MultiCompound MCC Plus4™ is a tour-proven, hybrid grip that features a larger lower hand and new softer rubber material. With a 4.6% larger lower hand diameter than the Original MCC, the Plus4 encourages lighter grip pressure, reduced tension, and increased power. The lower hand features a soft, responsive rubber compound ideal for enhanced feel. The upper hand material is a soft compound with Brushed Cotton Cord and new, strategically placed Micro-Plus4-LogoTexture for downswing stability. The larger lower hand, new softer material and all-weather control deliver new performance options to the #1 Hybrid Grip on Tour.

PISTOL GT 2.0

The new Pistol GT 2.0 with CounterCore Technology is our largest diameter, classic pistol shape that golfers love. CounterCore Technology lets golfers fine tune the feel and stability of the putter by adjusting the weight of the grip. Every new CounterCore putter grip comes with a 50g back-weight that engages larger muscles in the arms, shoulders and back, which results in more of a pendulum motion. Our patented NO TAPER design promotes even grip pressure, which leads to better putting. It can also be played without the weight if you prefer.

*Shafts categorized by flex weight average. Launch and Spin comparisons based on internal TaylorMade testing of each shaft. Shaft manufacturer-provided specification data was used help identify shaft characteristics in relation to each other. Chart serves as a reference guide to aid in custom shaft fitting and does not guarantee results with any particular shaft.
