PELLON® PRODUCT GUIDE

SEGMENT	SUB-SEGMENT	STYLE # / PRODUCT NAME	TYPE	WIDTH	DESCRIPTION / PROJECTS
CRAFTS & HOME DECOR	TRACING CLOTHS	810 Tru-Grid™	Sew-In	44"	1" printed graph for altering, duplicating or scaling patterns. Stable for ease of drawing.
		830 Easy Pattern®	Sew-In	45"	No-line, no-dots material for altering, duplicating and tracing patterns.
QUILTING	FLEECE	987F Fusible Fleece	Fusible	44"	Adds low-loft body to craft home decor, quilts, handbags & totes.
		987F Black Fusible Fleece	Fusible	44"	Low-loft fleece adds stability, definition & structure to quilts, handbags & totes.
		988 Fleece	Sew-In	44"	Low-loft polyester fleece. Use where a little padding is needed, when quilting or crafting.
		TP970 Thermolam® Plus Sew-In	Sew-In	45"	Heavily needled polyester fleece. Thicker than 988 Fleece. Adds more loft to project.
		TP971F Fusible Thermolam® Plus	Fusible	44"	A heavier needled-fleece. Adds body, firmness & loft to diaper bags & totes.
FUSIBLE WEBS & ADHESIVES	PAPERBACKED	725 Heavy Duty Wonder-Under®	Fusible	17"	Heavier, with paper backing & double adhesive of original Wonder-Under®. For appliques & hems in denim, canvas & heavy fabric or thick-to-thin combinations. Paper backing eases application.
		800 Clear-Fuse™	Fusible	20"	Easy-to-use clear paper backing with an even firm fusible. Makes cutting patterns easier.
		805 Wonder-Under®	Fusible	17"	Paper backing. Fuse fabric to fabric or a porous surface. Most fabric weights. For heavier fabrics, use 725 Heavy Duty Wonder-Under®. Paper backing eliminates separate transfer sheet; draw on backing with pencil or pen. Fuse hems, facings, appliques & trims.
		EZ212 E-Z-Steam® II	Fusible	12"	Two-sided pressure-sensitive web. Two paper backings for easy placement of appliques. Fuses fabric to fabric & other porous surfaces. Use for appliques, hems & fabric repair.
	NO BACKING	807 Wonder-Web®	Fusible	19"	Unsupported web replaces sewing & gluing areas layered between two fabrics, hems & larger areas.
	LAMINATES	100 Vinyl-Fuse™	Fusible	20"	Iron-on, paper-backed vinyl with a clear glossy finish. UV-rated and water repellant. Use for placemats, diaper bags and coasters.
EMBROIDERY	TEAR-AWAY	360 E-Z Stitch™	Sew-In	20"	Sew-in perforated lightweight stabilizer that tears away. Machine embroidery, applique, cut machine work & monogramming.
		371 Fuse-N-Tear	Fusible	20"	Medium-weight embroidery stabilizer tears away easily.
		806 Stitch-N-Tear®	Sew-In	20"	Tear-away stabilizer for machine stitching, machine embroidery, applique, cut work and monogramming.
	CUT-AWAY	380 Soft-N-Stay™	Sew-In	20"	Adds permanent body & support to lightweight knits & woven fabrics. Free-form design, T-shirt knits, dense embroidery designs.
	WASH-AWAY	541 Wash-N-Gone®	Sew-In	20"	All-temperature water-soluble stabilizer. Use for machine embroidery, lighter-weight fabrics or machine lacework. Washes away completely.
		551 Sol-U-Film™	Sew-In	19.75"	All-temperature water-soluble film stabilizer. Use on top of napped fabrics; use several layers when making machine lace.

HOW TO SELECT THE RIGHT PELLON® INTERFACING

Interfacing shapes, supports & stabilizes detail areas of a garment – collars, facings & waistbands. Choosing the right interfacing is key to a garment's appearance & performance. This guide will help identify the best choices for your project.

Most Pellon® interfacings & craft materials are nonwoven. Nonwovens are made directly from fibers bonded together to form a fabric. Nonwovens do not have a grain. They have little or no shrinkage & will not ravel. They can be washed or dry cleaned. Other types of Pellon® interfacings are woven, knitted or weft-inserted.

Interfacing may be fusible or sew-in. Fusibles have an adhesive on one side that is activated by your iron. Hand held steamers will not bond interfacing to fabric.

The choice of fusible & a sew-in interfacing depends on the fabric, the degree of firmness desired & personal preferences. Fusibles are great time savers. They're easy to work with & are compatible with most fabrics. They make a fabric slightly crisper than sew-in interfacing of comparable weight.

TIPS & TROUBLESHOOTING:

- All Pellon® fusibles include complete instructions. Pre-wash the fabric to pre-shrink it & to remove finishes that prevent fusibles from adhering. Check the package instructions. Nonwoven interfacings do not need to be pre-shrunk; woven & weft-inserted products do.
- Always test a swatch of fusible interfacing before using it for a project. Iron temperatures can vary, so a test will help determine the proper setting to use. Use a press cloth.
- If the fusible test swatch looks wrinkled, the fabric may be shrinking. Wash fabric again or use a lower fusing temperature. If the interfacing is too heavy, use a lighter weight or a sew-in style.
- Fusibles are meant to be permanent. If you want to remove fusible interfacing from fabric & it is not completely fused, reheat the area, pressing lightly. While warm, gently peel up.
- To remove fusible residue from fabric, iron with a dryer sheet or use a spot remover made for glue & adhesive.
- Use a hot iron cleaner to remove any fusible residue on the iron. Follow package directions.
- How to tell which is the fusible side: Most products have a dot adhesive. You can see or feel small dots on the rough side. If the product has a coated adhesive, the fusible side will be shiny.

PELLON® PRODUCT GUIDE						
SEGMENT	SUB-SEGMENT	STYLE # / PRODUCT NAME	TYPE	WIDTH	DESCRIPTION / PROJECTS	
APPAREL	BASIC	906F Fusible Sheerweight	Fusible	20"	Sheer to lightweight for stable support in detail areas, without adding weight. Nonwoven.	
		910 Sew-In Featherweight	Sew-In	20"	Feather- to midweight. Adds stability to detail areas, button holes, collars, waistbands & facings. Nonwoven.	
		911FF Fusible Featherweight	Fusible	20"	Feather- to midweight. Stabilizes detail areas in a wide variety of fabrics. Use to stabilize T-shirt quilts. Nonwoven.	
		911FF Charcoal Fusible Featherweight	Fusible	20"	Feather- to midweight. Stabilizes detail areas in a wide variety of fabrics. Use to stabilize T-shirt quilts. Nonwoven.
