Traveling can be one of the most amazing experiences for anyone. Having the chance to explore a different place, immerse in a culture, taste an interesting cuisine and becoming acquainted with locals are some of the benefits of taking on a journey to an unknown spot. However, as fun as it might be, the process of getting to your desired destination can become a bit stressful.

Baggage size and fees are changing constantly and it seems that most airlines consider luggage suited for

children as the average for every adult. Therefore, we are more limited as to what items we could take with us which leaves us with the daunting task to choose the right ones. Between picking the right outfits, choosing which shoes could be spared, and ensuring everything fits in a carry-on, we want to make your packing process as relaxed as possible.

So here goes the best travel and tech gadgets to help you be on the go, without any fuss!

BAGGALLINI GETAWAY ROLLER: Between size restrictions and unappealing colors, I have always had a hard time finding the perfect carry-on. That is why I fell in love with this bag, in this gorgeous color Apple, as soon as I saw it. It is incredibly lightweight, the fabric is durable and washable and the design is uber stylish. This chic luggage comes with 4 wheels, which helps you maneuver it around the airport with ease, and includes several padded compartments for laptops, tablets and delicate jewelry or makeup. It is the best companion for short trips or weekend getaways! \$198 www.Baggallini.com

BE BRILLIANT TRAVEL HANDBAG: The best way to pass quickly through TSA and avoid leaving behind any items, is to have a multi-functional handbag with you. The "Brilliant Body" purse is that and more! The bag is as gorgeous as practical. Made of sturdy vegan leather, it contains designated padded compartments to keep laptops and tablets safe and handy; in addition to a removable pouch for liquids or makeup, and several pockets for papers, books, gadgets, and valuables. To top it off, it brings a zippered bottom section ideal for an impromptu change of shoes! \$265 www.BeBrilliantBags.com

BRACKETRON WATERPROOF SELFIE STICK: To be honest, I cannot stand selfie sticks. However, after a recent trip to Punta Cana, I discovered how necessary it can be for underwater shots. This selfie stick is like none other. It is waterproof, sandproof and dirtproof which means you can submerge your smartphone, GoPro, or camera with no worries, and snap those beautiful turtles all day! The coolest part is that it has a Bluetooth button giving you the freedom to take pictures from afar. \$30 www.Bracketron.com
