

**Instructions**

1. Use the large square pegboard for your project. If you're using a clear pegboard, slide the actual-size pattern underneath it. Place all the beads for the design.
2. Cover the completed design with the ironing paper. Keeping the iron level, gently iron the beads in a circular motion for about 10 seconds to fuse the beads evenly. Ironed properly, the beads will still have an open center. On a 3-D project such as this, DO NOT OVER-IRON the beads as it will make the centers of the beads close and can make assembly difficult.
3. Once the design is cool, peel off the ironing paper. Lift your design from the pegboard; flip the design over and repeat step #2. Your pegboard and ironing paper are reusable.

**ASSEMBLY**

Slide the “feet” onto the bottom of each design to make it stand. Arrange the pieces of the village on a table top as desired. You can create a bed of artificial snow, or make Perler “snow” by mixing clear, white and toothpaste beads and spreading them on the table top. For the skating rink, try a round-cut piece of aluminum foil or plastic wrap stretched around a white piece of cardboard.
